

Countdown Timer

1. How it works

- 1 Switch on the board. The display shows **00**.
- 2 Connect your phone to the board's Wi-Fi.
- 3 Open the app page in the phone browser.
- 4 Set a number and press **START**.
- 5 The display counts down one number every second.

2. Connect your phone to the timer

Timer	Wi-Fi name	Password
1st timer	TIMER_01	12345678
2nd timer	TIMER_02	12345678

- 1 On the phone, open **Settings > Wi-Fi**.
- 2 Tap the timer's Wi-Fi name (TIMER_01 or TIMER_02).
- 3 Enter the password **12345678**.
- 4 Open the phone browser (Chrome).
- 5 Type **192.168.4.1** in the address bar and open it.
- 6 The countdown app page appears.

If the phone says "No internet", stay connected to the timer Wi-Fi. If the page does not open, turn off mobile data and try again.

3. How the app works

Button	What it does
SET	Type a number from 0 to 99 in the box and press SET. The number shows on the board. It does not start yet.
START	Starts counting down from the set number. If you pressed HOLD, it continues from the held number.
HOLD	Stops counting. The current number stays on the display.
RESET	Goes back to the last SET number and stops.

4. Example

- 1 Type **25** and press **SET**. The board shows 25.
- 2 Press **START**. It counts 24, 23, 22 ...
- 3 Press **HOLD** at 18. It stays at 18.
- 4 Press **START**. It continues 17, 16, 15 ...
- 5 Press **RESET** to go back to 25.
